

**Summative Assessment**  
**Problem-Solving Questions**

This will carry 20% of the overall assessment.

**Task**

You are given the following variables collected in a health survey: gender, age, education level, weight, and satisfaction score (1–5 scale).

- (a) Classify each variable by data type
- (b) Identify the correct scale of measurement

**Submission**

1. You may need to use the cover page for your assignment
2. Submit assignment in PDF format through MOOC Platform and email to [Theingi.maung@unikl.edu.my](mailto:Theingi.maung@unikl.edu.my)
3. Submit on due date.
